MAINTENANCE

To do..

..We recommended that the daily cleaning of oiled furniture is with a damp cloth followed by a dry cloth.

..When you treat your tabletop with a care product, you should always treat the underside of the plate too. Otherwise you risk it to bend.

..Cleaning, grinding and processing of wood must always be along the grains.

..Remember sometimes to leave the table and leaves uncovered, this allows the colors to be synchronized.

..indoor furniture can be damaged if left outdoors or in damp and unheated-rooms.

..In some cases you can repair small cracks and dents. Add a few drops of water to the injury. Sand it slightly with grain 100-120. Finish with a maintenance treatment.

Not to do..

..Do never use abrasives, bleach or ammonia to clean your furniture.

..Do not leave hot or humid things on the wood, it makes blotches.

..Do not leave the wood covered with airtight materials extended periods of time. The wood needs to breathe.

..Do not let the furniture in direct sunlight - the wood dries out. Alternatively you can turn the furniture 180 degrees once a month - to even out the color difference.

..End wood absorbs all sorts of liquid so we recommend you only to wipe it slightly when you clean it.

TIP:

Treat your furniture with a careproduct even before you start using it!
